19TH ANNUAL

---

***"Lotta Bull Sale"***

---

MONDAY, MARCH 13, 2017 - 1:00 PM MDT - AT THE RANCH

# PARRY ANGUS

Dear Cattlemen,

We would like to invite you to the 19th annual Parry Angus "Lotta Bull Sale". One thing is for sure, over the past few years, we have seen many changes in the cattle markets (or any ag market for that matter). But it does seem that we might be seeing a bit of a strengthening, or at least stabilization, of the cattle markets and that is welcome news!

For years we have discussed the value of maternal excellence as the best path to profitability in a cow herd. We have remained committed to selecting for these strong maternal traits as a base for our herd. Fertility, soundness, docility, etc. are the keys to producing more live calves that come easy and have explosive growth to really push the scales at weaning time and then have the ability to perform on the rail. But no matter what, it always starts with good cows.

Once again, we are excited to offer you a powerful set of 60 Angus and Sim-Angus bulls. Each of these individuals reflects a balance of traits that represents the focus of our genetic selection. Performance traits such as growth, muscle and carcass merit are important to ourselves as well as our customers, but so are functional traits such as maternal ability, disposition and soundness. We keep this in mind when we select our sires and replacement females each year and continue to strive to improve our genetic base. As a result, these bulls possess a "balance" of traits that we believe makes them complete. It is this balance of traits that makes us confident that these bulls will work in nearly any herd. However, we realize that some bulls will excel more in certain areas than others. So, we encourage you to drop by any time to view the bulls. We will help you in any way that we can to pick out a bull that will benefit your operation.

Once again, we are offering both Angus and Sim-Angus bulls. Our pure Angus bulls reflect careful genetic selection from only proven AI sires to produce bulls that will add pounds, muscle and eye appeal to any herd. Our impressive Sim-Angus bulls speak for themselves. Whether it is 1400 pound yearling weights or a 17 inch plus Rib Eye Area, it is safe to say that crossbreeding works. You've got to see these guys.

With the positive feedback of the new sale format, we are continuing to have our sale at the ranch with the help of DV Auctions and the same sale crew and auctioneer. Ty Groshans (DV Auctions) has taken video on the bulls and that video will be available on-line and in the sale ring. The bulls will be penned up outside the sale facility and video will be shown on large flatscreens inside. This format seems to be growing in popularity with many seedstock producers and worked well the past couple of years.

We would like to thank you for your consideration of our program. Whether you have invested in our genetics or are just looking for next time, we appreciate being your seedstock supplier. Feel free to call or stop by anytime and we will help you in any way we can. We look forward to seeing you on sale day!

Take care,

*The Parry Family*

*Ryan, Emily, Joanne, and Steve Parry*

# PARRY ANGUS

## AUCTIONEER

Dave Mullins.....1-317-503-2798

## LIVESTOCK PUBLICATION REPRESENTATIVES

Jim Geis, Western Livestock Journal.....1-970-590-0500

Kyle Schow, American Angus Association.....1-308-289-3772

## TERMS AND CONDITIONS

The terms of the sale are cash and all settlements must be made at the close of the sale.

## ANNOUNCEMENTS

All announcements from the auction block take precedence over the printed material.

## HEALTH

All bulls have had a complete vaccination program, as well as vaccinations for pinkeye and footrot, and have been backpoured with Ivermectin. Bulls have been given a complete soundness and fertility examination by Dr. Mike Coakley, DVM.

All bulls are AM, CA, and NH free by test or by pedigree.

All bulls have been genomic tested via Zoetis i50K

## VET AND ULTRASOUND

Vet - Dr. Mike Coakley, DVM.....1-970-522-2028

Ultrasound - Alvin Ruiz, WY Cattle Service.....1-307-532-1661

## LIABILITY

Everyone attending the sale does so at their own risk and responsibility. The owner and employees of Parry Angus assume no liability, legal or otherwise, in the event of accident, bodily injury, or loss of property.

## CATTLE VIEWING

The cattle may be viewed at Parry Angus any time before the sale. We appreciate if you call ahead, but visitors are always welcome. The bull's videos may also be viewed on-line at [www.dvauction.com](http://www.dvauction.com) and/or at [www.parryangus.com](http://www.parryangus.com)

## HAULING

Parry Angus will deliver bulls up to 150 miles to central locations at no charge.

## CONTACT INFORMATION

Home/Office.....1-970-522-1214

Steve Parry.....1-970-520-6966

Ryan Parry.....1-970-520-6963

Email.....[parryangus@hotmail.com](mailto:parryangus@hotmail.com)

Website.....[www.parryangus.com](http://www.parryangus.com)

## BULL WINTERING PROGRAM

If the buyer so desires, Parry Angus will care for and feed the bulls until April 1st at no charge. A feed charge of \$2.50 per head per day will apply after that date.

## FERTILITY AND BREEDING SOUNDNESS GUARANTEE

All bulls sold by Parry Angus are guaranteed breeders at the time of turnout. Bulls believed to be non-breeders may be returned to seller at buyer's expense and another bull, if available, will be provided. If such bull is not suited or needed, Parry Angus will give the buyer full credit on next year's sale.

## FIRST YEAR BREEDING SEASON GUARANTEE

All bulls selling for \$3000 or more will be covered 50% by Parry Angus if they are injured during their first breeding season and are not able to return to service during that first breeding season. Breeding season is defined as the 90-day period following the first turnout of bulls. 50% of the value of the injured bull, minus one-half salvage value will be split equally between Parry Angus and the buyer. All bulls must be diagnosed by a veterinarian. Please notify us as soon as possible should injury occur and prior to the injured bull being sold for salvage. All claims must be made by September 1, 2017. Salvage value will be assumed at \$1000. Parry Angus does not cover mortality.

## MORTALITY INSURANCE

Parry Angus does not cover mortality. Mortality is any injury that leads to the destruction of the bull without salvage value. To properly insure your investment, Jim Geis will be available to assist you with mortality insurance. (970) 590-0500

## VOLUME DISCOUNTS

Customers who purchase 3 bulls will receive a 3% discount, 4 bulls a 4% discount, and 5 bulls or more a 5% discount. Customers who haul their bulls home on sale day will receive a \$50.00 discount.

## FOOD AND REFRESHMENTS

A complimentary lunch will be served and refreshments will be provided starting at 11:00 on sale day.

## VIEW AND BID LIVE

The sale will be broadcast live on-line at: [www.dvauction.com](http://www.dvauction.com).

We recommend registering a minimum of 24 hours in advance.

Video on the bulls is available on-line anytime.

Ty Groshans, DV Auctions.....1-970-818-6016

## WATCH AND BID ON-LINE ~

Of Course, we would like to have you in attendance at our sale, but we understand that sometimes, life is just too busy. If you are unable to attend the sale in person, we have arranged for absentee bidding.

DVAuctions® has taken video of the bulls and that video is available at [www.parryangus.com](http://www.parryangus.com) as well as at [www.dvauction.com](http://www.dvauction.com).

If you are unable to attend, visit the DVAuction® website and create a new account under the "create an account" tab. Then apply for a bidding by clicking the "apply for bidding" icon in the upper left corner of the screen. Please do so at least 24 hours in advance. We also encourage you to drop by any time and see the bulls for yourself. We will help in any way we can to help you pick out the right bull. You may also leave a bid with any of the livestock publication representatives listed on the previous page.

This sale will be broadcast live on the internet.

# DVAuction

Broadcasting Real-Time Auctions

Real time bidding & proxy bidding available.

The following table gives Breed Average EPD's for non-parent bulls according to the 2017 spring sire summary from the American Angus Association.

Production										Maternal					Carcass				\$ Values			
CED	BW	WW	YW	RADG	DMI	YH	SC	Doc	HP	CEM	Milk	MW	MH	\$EN	CW	Marb	RE	Fat	\$W	\$F	\$G	\$B
+6	+1.2	+48	+85	+21	+19	+5	+77	+14	+11.1	+8	+24	+27	+3	-4.18	+33	+56	+51	+020	43.34	39.20	31.86	105.91

### PRODUCTION EPDs

**Calving Ease Direct (CED)**, is expressed as a difference in percentage of unassisted births, with a higher value indicating greater calving ease in first-calf heifers. It predicts the average difference in ease with which a sire's calves will be born when he is bred to first-calf heifers.

**Birth Weight EPD (BW)**, expressed in pounds, is a predictor of a sire's ability to transmit birth weight to his progeny compared to that of other sires.

**Weaning Weight EPD (WW)**, expressed in pounds, is a predictor of a sire's ability to transmit weaning growth to his progeny compared to that of other sires.

**Yearling Weight EPD (YW)**, expressed in pounds, is a predictor of a sire's ability to transmit yearling growth to his progeny compared to that of other sires.

**Scrotal Circumference EPD (SC)**, expressed in centimeters, is a predictor of the difference in transmitting ability for scrotal size compared to that of other sires.

**Docility (Doc)**, is expressed as a difference in yearling cattle temperament, with a higher value indicating more favorable docility. It predicts the average difference of progeny from a sire in comparison with another sire's calves. In herds where temperament problems are not an issue, this expected difference would not be realized.

### MATERNAL EPDs

**Maternal Milk EPD (Milk)**, is a predictor of a sire's genetic merit for milk and mothering ability as expressed in his daughters compared to daughters of other sires. In other words, it is that part of a calf's weaning weight attributed to milk and mothering ability.

**Cow Energy Value (\$EN)**, expressed in dollar savings per cow per year, assesses differences in cow energy requirements as an expected dollar savings difference in daughters of sires. A larger value is more favorable when comparing two animals (more dollars saved on feed energy expenses). Components for computing the cow \$EN savings difference include lactation energy requirements and energy costs associated with differences in mature cow size.

### CARCASS EPDs

**Marbling EPD (Marb)**, expressed as a fraction of the difference in USDA marbling score of a sire's progeny compared to progeny of other sires.

**Ribeye Area EPD (RE)**, expressed in square inches, is a predictor of the difference in ribeye area of a sire's progeny compared to progeny of other sires.

### \$VALUE INDEXES

\$Value indexes are multi-trait selection indexes, expressed in dollars per head, to assist beef producers by adding simplicity to genetic selection decisions. The \$Value is an estimate of how future progeny of each sire are expected to perform, on average, compared to progeny of other sires in the database if the sires were randomly mated to cows and if calves were exposed to the same environment. More Info

**Weaned Calf Value (\$W)**, an index value expressed in dollars per head, is the expected average difference in future progeny performance for preweaning merit. \$W includes both revenue and cost adjustments associated with differences in birth weight, weaning direct growth, maternal milk and mature cow size.

**Feedlot Value (\$F)**, an index value expressed in dollars per head, is the expected average difference in future progeny performance for postweaning merit compared to progeny of other sires.

**Grid Value (\$G)**, an index value expressed in dollars per head, is the expected average difference in future progeny performance for carcass grid merit compared to progeny of other sires.

•Quality Grade (\$QG) \$QG represents the quality grade segment of the economic advantage found in \$G. \$QG is intended for the specialized user wanting to place more emphasis on improving quality grade. The carcass marbling (Marb) EPD contributes to \$QG.

•Yield Grade (\$YG) \$YG represents the yield grade segment of the economic advantage found in \$G. \$YG is intended for the specialized user wanting to place more emphasis on red meat yield. It provides a multi-trait approach to encompass ribeye, fat thickness and weight into an economic value for red meat yield.

**Beef Value (\$B)**, an index value expressed in dollars per head, is the expected average difference in future progeny performance for postweaning and carcass value compared to progeny of other sires.

# WE ARE PROUD TO OFFER YOU i50K TESTED GENETICS

Powered by i50K™ from Zoetis, our cattle sell with genomic-enhanced expected progeny differences (GE-EPDs).

With GE-EPDs, we're confident that customers like you can minimize risk in their investment — and enhance the productivity of your cattle.

The benefits of buying i50K-tested bulls and heifers goes beyond added accuracy for the complete range of traits for more productive daughters and progeny. You'll know early on what that animal is likely to transmit to its offspring and potential for performance in the feedlot and on the rail. You can also match the i50K tested sires you buy from us to match calves and replacement heifers — through GeneMax® Advantage™ and GeneMax® Focus™— to make better breeding and management decisions down the road.

Knowing an animal's potential. Continuous progress of your herd. That's why we test with i50K.

Number of progeny records in conventional genetic evaluation needed to achieve the same accuracy as GE-EPDs powered by i50K

Trait	Progeny Equivalents
Heifer Pregnancy (HP)	22
Calving Ease Direct (CED)	24
Birth Weight (BW)	13
Milk	14
Docility (Doc)	11
Scrotal Circumference (SC)	16
Weaning Weight (WW)	19
Yearling Weight (YW)	24
Dry Matter Intake (DMI)	17
Yearling Height (YH)	12
Mature Weight (MW)	16
Carcass Weight (CW)	7
Marbling (Marb)	8
Ribeye Area (RE)	11
Fat Thickness (Fat)	12

## Why use Genomic Enhanced (GE) EPD's?

Alot of things about i50K® can be very confusing.

Listen, i50K® (DNA Testing) basically allows our customers the luxury of being able to look at EPDs that are as accurate as if the bull they are considering already has 10 to 20 progeny. In this way, you are more able to know exactly what you are buying and be more confident that the bull you are considering will more likely reflect his current EPDs. It is simply a tool that allows us to give our customers that added peace of mind.

There are alot of scientific advances concerning cattle out there, specifically in the Angus breed, and our job is to enterpret them and decide how to use them. If you have any questions regarding DNA testing or anything else, simply ask us about it and we will attempt to answer any questions.

The table on the left shows how the DNA test affects each trait, what the new accuracy (increased) would be, and approximately how many progeny it would be like the bull already has.

## Directions

Parry Angus is located about 9 miles north of Sterling, CO at 21998 CR 46, Sterling, CO 80751. It is also 1 mile South and 1 mile east of Padroni, CO or about 4 miles east of Iliff, CO.

### From Sterling:

Take CO Highway 138 north out of Sterling and cross the railroad tracks. Continue on Hwy 138 northeast about 6 miles. Turn north (left) onto CO Highway 113 towards Peetz/Sidney. Go 2 miles. Turn west (left) onto County Road 46. Go 2 miles and look for Parry Angus sign. Directions where to turn close to the sale will be marked.

### From Sidney, NE:

Take Highway 113 south towards Sterling, CO. Go about 24 miles. Turn west (right) onto County Road 46. Go 2 miles. Look for Parry Angus sign. Directions close to the sale will be marked.

### From I-76 and Iliff, CO:

Take the Iliff Exit 134. Go 3.6 miles north on Hwy 55. Turn west (left) onto CO Highway 138 and go 3.6 miles. Turn north (right) onto CO Highway 113 towards Peetz/Sidney and go 2 miles. Turn west (left) onto County Road 46 and go 2 miles. Look for Parry Angus sign. Directions close to the sale will be marked.

This is a stylish, well built, "full package" kind of bull.

### Bull Feeding and Development-

At Parry Angus, we strive to feed our bulls to best maximize genetic expression without compromising practicality. That's just another way of saying we feed the bulls just hard enough to look good and grow without having them fall apart when they go to work for you.

It is always a concern of ours to feed enough to allow the bulls to perform to their potential, but we understand that many producers are concerned about how the bulls will do once they are taken off feed. As a result, we will not push the bulls too hard and once the sale is over, the bulls are slowly backed off feed to a ration that will firm them up and prepare them to go to work.

This is a more moderate framed Combination son that is thick topped and wide based. He is a calving ease bull that ratioed 113 for WW.

Dalton and Ryan working bulls

Gene Manuella, owner of Manuella's Inc., has been buying bulls from Parry Angus for years. As a producer who owns a 3000 head feedlot and a progressive cow-calf operation, and is the past president of the Colorado Cattlemen's Association, he certainly knows the value of purchasing high quality seedstock. We would like to thank Gene for being such a loyal customer over the years and such a true advocate for agriculture, not just locally, but on a state-wide level as well.

This is a long bodied, stylish Comrade son out of an excellent pathfinder New Design 878 cow that has had a great career here at Parry Angus.

*A big thanks to Dalton Kent. He has become more than just a hired man. He is also a friend and a hunting partner. We have grown to trust his opinion nearly as much as our own, especially when it comes to the cows. Thanks again buddy. We couldn't do it without you.*

## Sim-Angus Bulls-

This is our fifth year offering Sim-Angus Bulls. The idea came to us after a few long-time customers explained that they have been using Angus bulls for a long time and wanted to cross out. Well, you can't blame a producer for wanting to take advantage of heterosis and get that extra bump in growth and performance. That means more pounds on sale day and a bigger paycheck. Consequently, we searched for an answer that would offer our customers a unique cross to take advantage of additional growth and muscle while maintaining the traits that make the Angus breed so popular. Our Sim-Angus program was born. Our Simmental cross bulls are the ideal blend of maternal, carcass merit and calving ease of the Angus breed along with the added growth, performance, and muscle of the Simmental breed. Our goal is to produce Sim-Angus bulls out of proven Simmental sires that maintain moderate frame and calving ease, but that will perform in any condition.

### THE CHART BELOW IS TO CONVERT SIMMENTAL EPD'S TO ANGUS EPD'S

#### TO CONVERT FROM SIMMENTAL TO ANGUS:

<b>BW</b>	<b>ADD 3.4 POUNDS TO SIMMENTAL EPD</b>
<b>WW</b>	<b>SUBTRACT 6.4 POUNDS FROM SIMMENTAL EPD</b>
<b>MM</b>	<b>ADD 0.5 POUNDS TO SIMMENTAL EPD</b>
<b>YW</b>	<b>SUBTRACT 13.6 POUNDS FROM SIMMENTAL EPD</b>

<b>MARB</b>	<b>SUBTRACT 0.41 % FROM SIMMENTAL EPD</b>
<b>REA</b>	<b>ADD 0.46 SQUARE INCHES TO SIMMENTAL EPD</b>
<b>FAT</b>	<b>SUBTRACT 0.149 INCHES FROM SIMMENTAL EPD</b>

**WHEN YOU USE THIS CHART, THE FINAL NUMBER WILL BE THE EQUIVALENT OF AN ANGUS EPD**

**DO THE SAME OPERATION IN REVERSE (I.E. ADD INSTEAD OF SUBTRACT) TO CONVERT FROM ANGUS TO SIMMENTAL**

Clyde and Braden Schaal

My Granddad and father were one of the first buyers at the 1st annual Parry Angus Bull Sale, and our operation has not missed a sale since. I will be the third generation to buy bulls from Parry Angus.

It's simple. The Parry's are great, honest and knowledgeable people in the cattle industry. It's like putting your trust in your own family to provide you with industry leading genetics.

Our herd is blessed to be known as a reputation herd. We have high performance calves that grade over 98% choice and over 12% prime while having exceptional weaning weights. We also market breeding stock every year that bring premium prices.

For 18 years we have been buying bulls from Parry Angus and they continue to supply the majority of our herd bulls today. The bulls have given our herd many advantages over others, and they have truly made our female foundation what it is today. I feel very fortunate that our family has invested in Parry Angus genetics. I am the generation that gets to see the benefits and financial returns year after year from what the relationship between Parry's and my family has started. For that, I say thank you to the Parry family and mine as well for giving me a great head start in this very competitive cattle industry.

~Braden Schaal,  
 Schaal Cattle Company, Burlington, CO.

*This year we are offering 15 Angus and Sim-Angus Yearling Open Heifers for sale. These heifers are feminine, deep bodied and stout made. They should make excellent replacements. All of the heifers have been through a full vaccination program and have been Bangs Vaccinated. They are open and ready to breed. We will offer the heifers in groups of 5, and the winning bidder can choose from one to the entire group. If there are heifers left in the group, the remainder will be sold on the second bidding process. If you have any questions about these females or would like some additional information, feel free to contact us. We will answer any question we can.*
