20TH ANNUAL

“Lotta Bull Sale”

MONDAY, MARCH 12, 2018 - 1:00 PM MDT - AT THE RANCH

Emily, Ransom, Ryan, and Paige Parry

Dear Cattlemen,

We would like to welcome you to the 20th Annual Parry Angus “Lotta Bull Sale”. It seems like time just flies by. We feel truly blessed to be in this business. As a family run farm and ranch, there are a few things that are very dear to us. The most important is the opportunity to work with family on a daily basis. Another is the opportunity to cultivate relationships with customers that, in time, become more like friends. This, and getting to raise quality cattle, make life more rewarding.

We are very pleased to offer you this set of Angus and Sim-Angus bulls. It has been fun watching them grow from calves to where they are now. Each year seems to bring it’s own set of challenges and rewards, but that is what keeps us constantly striving to improve. We hope you like what you see.

Please feel free to call or stop by the ranch at any time. We love the opportunity to take a break from work and talk cattle. We are so thankful for everyone who continues to support our program.

See you on Sale Day.

Take care,

The Parry's

Joanne, Paige, Steve, and Ransom Parry

AUCTIONEER

Dave Mullins.....1-317-503-2798

LIVESTOCK PUBLICATION REPRESENTATIVES

Jim Geis, Western Livestock Journal.....1-970-590-0500
Kyle Schow, American Angus Association.....1-308-289-3772

TERMS AND CONDITIONS

The terms of the sale are cash and all settlements must be made at the close of the sale.

ANNOUNCEMENTS

All announcements from the auction block take precedence over the printed material.

HEALTH

All bulls have had a complete vaccination program, as well as vaccinations for pinkeye and footrot, and have been backpoured with Clean Up. Bulls have been given a complete soundness and fertility examination by Dr. Mike Coakley, DVM.
All bulls are AM, CA, and NH free by test or by pedigree.

VET AND ULTRASOUND

Vet - Dr. Mike Coakley, DVM.....1-970-522-2028
Ultrasound - Brian Frank.....1-970-218-0309

LIABILITY

Everyone attending the sale does so at their own risk and responsibility. The owner and employees of Parry Angus assume no liability, legal or otherwise, in the event of accident, bodily injury, or loss of property.

CATTLE VIEWING

The cattle may be viewed at Parry Angus any time before the sale. We appreciate if you call ahead, but visitors are always welcome. The bull's videos may also be viewed on-line at www.dvauction.com and/or at www.parryangus.com

HAULING

Parry Angus will deliver bulls up to 150 miles to central locations at no charge. Delivery will begin approximately April 1st.

20th Annual

"Lotta Bull Sale"

Monday, March 12, 2018, 1:00 PM MDT

BULL WINTERING PROGRAM

If the buyer so desires, Parry Angus will care for and feed the bulls until April 1st at no charge. A feed charge of \$2.50 per head per day will apply after that date.

FERTILITY AND BREEDING SOUNDNESS GUARANTEE

All bulls sold by Parry Angus are guaranteed breeders at the time of turnout. Bulls believed to be non-breeders may be returned to seller at buyer's expense and another bull, if available, will be provided. If such bull is not suited or needed, Parry Angus will give the buyer full credit on next year's sale.

FIRST YEAR BREEDING SEASON GUARANTEE

All bulls selling for \$3000 or more will be covered by Parry Angus if they are injured during their first breeding season and are not able to return to service during that first breeding season. Breeding season is defined as the 90-day period following the first turnout of bulls. The value of the injured bull minus the salvage value will be split 50% by Parry Angus and the customer. This amount will be provided to the customer towards a replacement bull or as credit on the next year's sale for one bull only. Salvage value will be assumed at \$1500. Parry Angus does not cover mortality. All injuries must be diagnosed by a veterinarian. All claims must be made by September 1.

MORTALITY INSURANCE

Parry Angus does not cover mortality. Mortality is any injury that leads to the destruction of the bull without salvage value. To properly insure your investment, Jim Geis will be available to assist you with mortality insurance. (970) 590-0500

VOLUME DISCOUNTS

Customers who purchase 3 bulls will receive a 3% discount, 4 bulls a 4% discount, and 5 bulls or more a 5% discount. Customers who haul their bulls home on sale day will receive a \$50.00 discount.

FOOD AND REFRESHMENTS

A complimentary lunch will be served and refreshments will be provided starting at 11:00 on sale day.

VIEW AND BID LIVE

The sale will be broadcast live on-line at: www.dvauction.com. We recommend registering a minimum of 24 hours in advance. Video on the bulls is available on-line anytime.

Directions

Parry Angus is located about 9 miles north of Sterling, CO at 21998 CR 46, Sterling, CO 80751. It is also 1 mile South and 1 mile east of Padroni, CO or about 4 miles east of Iliff, CO.

From Sterling:

Take CO Highway 138 north out of Sterling and cross the railroad tracks. Continue on Hwy 138 northeast about 6 miles. Turn north (left) onto CO Highway 113 towards Peetz/Sidney. Go 2 miles. Turn west (left) onto County Road 46. Go 2 miles and look for Parry Angus sign. Directions where to turn close to the sale will be marked.

From Sidney, NE:

Take Highway 113 south towards Sterling, CO. Go about 24 miles. Turn west (right) onto County Road 46. Go 2 miles. Look for Parry Angus sign. Directions close to the sale will be marked.

From I-76 and Iliff, CO:

Take the Iliff Exit 134. Go 3.6 miles north on Hwy 55. Turn west (left) onto CO Highway 138 and go 3.6 miles. Turn north (right) onto CO Highway 113 towards Peetz/Sidney and go 2 miles. Turn west (left) onto County Road 46 and go 2 miles. Look for Parry Angus sign. Directions close to the sale will be marked.

WATCH AND BID ON-LINE ~

Of Course, we would like to have you in attendance at our sale, but we understand that sometimes, life is just too busy. If you are unable to attend the sale in person, we have arranged for absentee bidding. DVAuctions® has taken video of the bulls and that video is available at www.parryangus.com as well as at www.dvauction.com.

If you are unable to attend, visit the DVAuction® website and create a new account under the “create an account” tab. Then apply for a bidding by clicking the “apply for bidding” icon in the upper left corner of the screen. Please do so at least 24 hours in advance. We also encourage you to drop by any time and see the bulls for yourself. We will help in any way we can to help you pick out the right bull. You may also leave a bid with any of the livestock publication representatives listed on the previous page.

This sale will be broadcast live on the internet.

DVAuction

Broadcasting Real-Time Auctions

Real time bidding & proxy bidding available.

The following table gives Breed Average EPD's for non-parent bulls according to the 2017 spring sire summary from the American Angus Association.

Production										Maternal				Carcass				\$ Values				
CED	BW	WW	YW	RADG	DMI	YH	SC	Doc	HP	CEM	Milk	MW	MH	\$EN	CW	Marb	RE	Fat	\$W	\$F	\$G	\$B
+6	+1.2	+48	+85	+21	+19	+5	+77	+14	+11.1	+8	+24	+27	+3	-4.18	+33	+56	+51	+020	43.34	39.20	31.86	105.91

PRODUCTION EPDs

Calving Ease Direct (CED), is expressed as a difference in percentage of unassisted births, with a higher value indicating greater calving ease in first-calf heifers. It predicts the average difference in ease with which a sire's calves will be born when he is bred to first-calf heifers.

Birth Weight EPD (BW), expressed in pounds, is a predictor of a sire's ability to transmit birth weight to his progeny compared to that of other sires.

Weaning Weight EPD (WW), expressed in pounds, is a predictor of a sire's ability to transmit weaning growth to his progeny compared to that of other sires.

Yearling Weight EPD (YW), expressed in pounds, is a predictor of a sire's ability to transmit yearling growth to his progeny compared to that of other sires.

Scrotal Circumference EPD (SC), expressed in centimeters, is a predictor of the difference in transmitting ability for scrotal size compared to that of other sires.

Docility (Doc), is expressed as a difference in yearling cattle temperament, with a higher value indicating more favorable docility. It predicts the average difference of progeny from a sire in comparison with another sire's calves. In herds where temperament problems are not an issue, this expected difference would not be realized.

MATERNAL EPDs

Maternal Milk EPD (Milk), is a predictor of a sire's genetic merit for milk and mothering ability as expressed in his daughters compared to daughters of other sires. In other words, it is that part of a calf's weaning weight attributed to milk and mothering ability.

Cow Energy Value (\$EN), expressed in dollar savings per cow per year, assesses differences in cow energy requirements as an expected dollar savings difference in daughters of sires. A larger value is more favorable when comparing two animals (more dollars saved on feed energy expenses). Components for computing the cow \$EN savings difference include lactation energy requirements and energy costs associated with differences in mature cow size.

CARCASS EPDs

Marbling EPD (Marb), expressed as a fraction of the difference in USDA marbling score of a sire's progeny compared to progeny of other sires.

Ribeye Area EPD (RE), expressed in square inches, is a predictor of the difference in ribeye area of a sire's progeny compared to progeny of other sires.

\$VALUE INDEXES

\$Value indexes are multi-trait selection indexes, expressed in dollars per head, to assist beef producers by adding simplicity to genetic selection decisions. The \$Value is an estimate of how future progeny of each sire are expected to perform, on average, compared to progeny of other sires in the database if the sires were randomly mated to cows and if calves were exposed to the same environment. [More Info](#)

Weaned Calf Value (\$W), an index value expressed in dollars per head, is the expected average difference in future progeny performance for preweaning merit. \$W includes both revenue and cost adjustments associated with differences in birth weight, weaning direct growth, maternal milk and mature cow size.

Feedlot Value (\$F), an index value expressed in dollars per head, is the expected average difference in future progeny performance for postweaning merit compared to progeny of other sires.

Grid Value (\$G), an index value expressed in dollars per head, is the expected average difference in future progeny performance for carcass grid merit compared to progeny of other sires.

•Quality Grade (\$QG) \$QG represents the quality grade segment of the economic advantage found in \$G. \$QG is intended for the specialized user wanting to place more emphasis on improving quality grade. The carcass marbling (Marb) EPD contributes to \$QG.

•Yield Grade (\$YG) \$YG represents the yield grade segment of the economic advantage found in \$G. \$YG is intended for the specialized user wanting to place more emphasis on red meat yield. It provides a multi-trait approach to encompass ribeye, fat thickness and weight into an economic value for red meat yield.

Beef Value (\$B), an index value expressed in dollars per head, is the expected average difference in future progeny performance for postweaning and carcass value compared to progeny of other sires.

Bull Feeding-

At Parry Angus, we strive to feed our bulls to best maximize genetic expression without compromising practicality. That's just another way of saying we feed the bulls just hard enough to look good and grow without having them fall apart when they go to work for you.

It is always a concern of ours to feed enough to allow the bulls to perform to their potential, but we understand that many producers are concerned about how the bulls will do once they are taken off feed. As a result, we will not push the bulls too hard and once the sale is over, the bulls are slowly backed off feed to a ration that will firm them up and prepare them to go to work.

Branding time! Steve, Ryan and Emily.

We operate the Cecil's family owned cow/calf and yearling operation at Cope, Colorado. Our ranch has been purchasing Parry Angus Bulls for 15 years. Our operation runs 350 mother cows, weans the calves in the fall, retains ownership and sells the steers at a later date to a local feedyard.

The heifers are developed to be sold as reputation bred heifers with a strong emphasis on maternal traits with a quiet disposition.

Thanks to the Parry family for their commitment to raising seed stock with the genetics to be profitable in today's cattle industry

~ Jim and Vickie Cecil

11	-0.6	48	89	0.83	27	-8.41	0.32	0.38	50.36	84.32

CALVING EASE This is a high performing, big ribbed, stout made Comrade son that provides excellent calving ease. His outstanding pathfinder dam produced a \$8750 bull that sold to Schaal Cattle Company in our 2015 sale.

Schreiber Ranch, operated by Gerald and Kay Schreiber family, is a third generation outfit running 250 Angus based commercial cows at Last Chance, CO. Our cows run on native short grass prairie and expired CRP planted grass. Since we do not raise feed, we continue to try to develop our cow herd to work in our harsh environment. The catch .22 is that we sell calves on the video that have to work in the feedlot as calf feds.

We have bought several bulls over the years from Parry Angus. Their early calving allows us to get good coverage from their yearling bulls We have been able to find bloodlines that will work for developing females and as calf feds for our feeder buyers. Parry's do a great job providing information on their bulls.

We are active in R-CALF USA and Colorado Independant Cattle Growers Association and feel very strongly that our good American beef should be labeled so our customers can differentiate our superior quality beef and our superior production protocols.

Respectfully,
 ~Gerald and Kay Schreiber, Schreiber Ranch

CALVING EASE This is an easy keeping, moderate framed Conversation son that gives you a nice look from the side. His dam comes from an outstanding pathfinder cow family.

2017 bulls being inspected before the sale.

Our Philosophy-

When Parry Angus began, we knew we had to have a goal for our breeding program. What was our vision for the herd? The conclusion we came to is "balance". These bulls are bred to carry a balance of traits. Many producers will attempt to chase the latest trend in the industry or single trait select to achieve a goal in their herd. But usually this comes at the expense of other traits that make up the "balance" or completeness of cattle that allows them to excel. Truly great cattle will have all of the pieces needed to be exceptional. This is how we approach our breeding program. We breed our cows with the intention of producing great females. After all, females are the base of our herd and every set of bulls that we produce every year. Without great females, Parry Angus would cease to exist. Because we breed for great females with balance in mind, we also get bulls with a balance of traits. That gives them the flexibility to meet the need of nearly any producer. We believe the phenotype and genetics behind these cattle gives them the unique ability to not only offer you value-added traits such as carcass merit, but also functional traits such as muscle, growth, fleshing ability, disposition, and strong maternal characteristics.

Sim-Angus Bulls-

This is our fifth year offering Sim-Angus Bulls. The idea came to us after a few long-time customers explained that they have been using Angus bulls for a long time and wanted to cross out. Well, you can't blame a producer for wanting to take advantage of heterosis and get that extra bump in growth and performance. That means more pounds on sale day and a bigger paycheck. Consequently, we searched for an answer that would offer our customers a unique cross to take advantage of additional growth and muscle while maintaining the traits that make the Angus breed so popular. Our Sim-Angus program was born. Our Simmental cross bulls are the ideal blend of maternal, carcass merit and calving ease of the Angus breed along with the added growth, performance, and muscle of the Simmental breed. Our goal is to produce Sim-Angus bulls out of proven Simmental sires that maintain moderate frame and calving ease, but that will perform in any condition.

THE CHART BELOW IS TO CONVERT SIMMENTAL EPD'S TO ANGUS EPD'S

TO CONVERT FROM SIMMENTAL TO ANGUS:

BW	ADD 3.4 POUNDS TO SIMMENTAL EPD
WW	SUBTRACT 6.4 POUNDS FROM SIMMENTAL EPD
MM	ADD 0.5 POUNDS TO SIMMENTAL EPD
YW	SUBTRACT 13.6 POUNDS FROM SIMMENTAL EPD

MARB	SUBTRACT 0.41 % FROM SIMMENTAL EPD
REA	ADD 0.46 SQUARE INCHES TO SIMMENTAL EPD
FAT	SUBTRACT 0.149 INCHES FROM SIMMENTAL EPD

WHEN YOU USE THIS CHART, THE FINAL NUMBER WILL BE THE EQUIVALENT OF AN ANGUS EPD

DO THE SAME OPERATION IN REVERSE (I.E. ADD INSTEAD OF SUBTRACT) TO CONVERT FROM ANGUS TO SIMMENTAL
